

## VFD Key

- A. Date Treated:** Record the start and end date the medicated feed was last fed to the animal(s).
- B. Group/Animal ID:** Record animal identification or how the animals are specifically identified as a group.
- C. Animal Site/Location:** Record specifically where the animal(s) being fed medicated feed are located.
- D. VFD #:** Record the VFD number specific to the identified VFD order to be used.
- E. VFD Expiration:** Record VFD expiration date identified on the VFD order. If the animal feed cannot be fed prior to the original VFD expiration date, then a new VFD is required.
- F. Indication:** Record reason for medicated feed (e.g. swine respiratory disease, bacterial pneumonia).
- G. Drug/Combination:** Record drug(s) used in medicated feed and any drug combinations in the feed, if necessary (trade name or drug).
- H. Species:** Record the species that is being fed the medicated feed (swine, cattle, sheep, goat).
- I. Production Class:** Record the specific production class of animals fed the medicated feed (nursery, grower, finisher, non-lactating cattle, beef cattle).
- J. Number of Animals Treated:** Approximate number of animals fed the medicated feed.
- K. Weight of Animals:** Record approximate weight of animal to be treated/fed.
- L. Withdrawal Period & Date:** Record the withdrawal period, if any, according to label use of drug/feed and calculate the date from last treatment/feeding.
- M. Outcome of Treatment:** Record the final disposition of the animal treated/fed (e.g. returned to herd, culled, sale barn, direct to harvest, remained in herd, died).
- N. “Good to Go!”:** Review all treatment/feeding records and protocols to assure the treated animal is clear of all withdrawal periods and is “Good to Go!”
